Part 1A :Service Level Progress 'Independent Validation'

To validate the progress claimed under 'Service Level Progress', assessors will cross check with citizens/residents/shopkeepers along with on-field checking of physical infrastructure/ICT based interventions. The sample size for each city and negative marking on account of sample failure would be as per population.

Impact on 'Service Level Progress' Marks claimed

- Step-1:** % of samples failed will lead to same % of marks deducted from the marks claimed under 'Service Level Progress' = **Adjusted Marks**
- Step-2:** Negative Marking: On account of failure of samples from 20% onwards, further negative marking will be applied as per the following table, to calculate '**Final Marks**'

Sample Failure (%)	% of Negative Marking on Total Marks claimed, to be deducted from 'Adjusted Marks'
<20%	0%
20% - 49%	5%
50% - 74%	10%
75% - 99%	15%
100%	20%

Example

Indicator No.	Total Marks	Marks Claimed	% of Samples failed	Marks of be deducted	Adjusted Marks	% of Negative Marking	Negative Marks	Final Markls
